Ex-Cell Kaiser LLC - REACH Compliance Letter

Dear Customer:

On June 1, 2007, the European Commission established new regulations (EC 1907/2006) that cover the Registration, Evaluation, and Authorization of Chemicals (REACH). The aim of REACH is to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances.

Based on the information currently available, the products Ex-Cell Kaiser LLC (Ex-Cell Kaiser) provides to your company meet the REACH criteria for an “Article”, as opposed to a “Substance” or “Preparation”. Articles are exempt from the REACH requirements if (a) the Article does not contain a substance of very high concern (SVHC) or candidate substance in an amount exceeding 0.1% weight by weight, and (b) if substances present in the Article in excess of 1 ton per year per importer are not expected nor intended to be released.

Neither of these conditions applies to products or similar Articles sold by Ex-Cell Kaiser, based on the information provided to Ex-Cell Kaiser from its suppliers. Accordingly, we foresee no registration or pre-registration requirement for the products we supply to our customers.

So far as we are aware, based on the information provided to us by our suppliers, the products sold to you by Ex-Cell Kaiser do not contravene the requirements in REACH concerning the marketing or use of substances listed in Annex XIV or Annex XVII of REACH.

While our products do not currently fall within the scope of REACH’s registration requirement, we continue to monitor the development of new EU regulations that may require further review of our products and/or manufacturing techniques.

Thank you for your continued support.
